

SINGLE WIRE SAW M400

EDAB
AUTOMATION

EDAB Systems introduces the most reliable and lowest cost Wire Cutting System to the stone industry. It allows to cut materials such as marble, granite and sandstone.

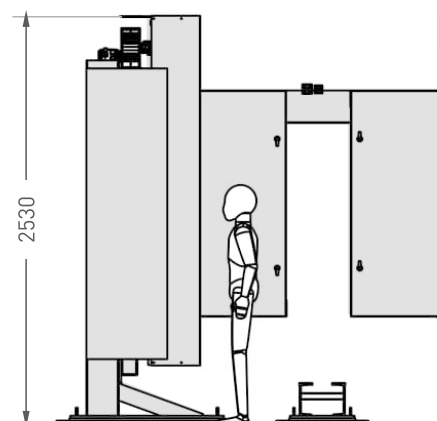

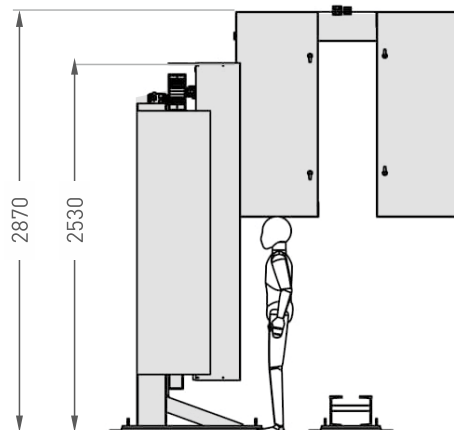

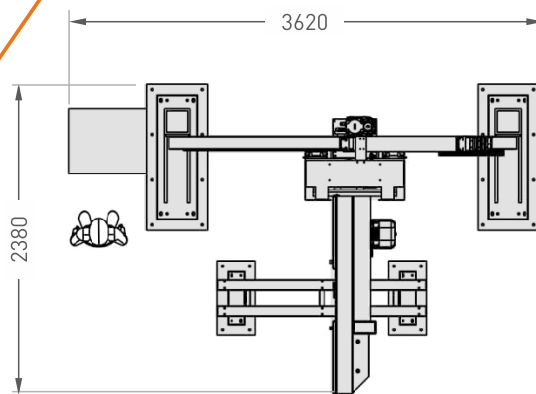

MAIN BENEFITS

- Maximum minimalization of cutting costs
- Less noise
- Better comfort for the operator than cutting on swinging saws
- Simple operation
- Foundations not needed
- Contours can be drawn in any CAD program and imported into our software as DXF files

WORKING GRAPHICS

TECHNICAL DATA

X axis stroke	1400 mm
Y axis stroke	1200 mm
Power	6 kW
Water demand	60 l/mln
Air demand	50 l/mln
Max. thickness of the stone	400 mm
<p>Water flow sensor Inverter Water electrovalve Wire breaking control Cutting wire Air pressure sensor</p>	

SIEMENS

Software, studied and developed for the stone, is easy to learn and is updated constantly. Advanced checkup and diagnostics system. Worldwide customer service. Our software is digital, high-tech NC system that makes it possible to make better use of electro-mechanical properties of EDAB machine and to achieve higher machining speeds with the highest precision.
