EDAB
AUTOMATION

EDAB Automation introduces the most reliable and lowest cost, innovative robot systems to the stone industry.

It allows to cut and treat marble, granite and other materials.

MAIN BENEFITS

- Save 20% on material and 70% on labor due to the possibility of adding a second table. Dual Table System means you can double your production.
- Installation of the machine runs quickly and does not require customer to put special constructions at his own expense.
- KUKA robot is designed to for its first maintenance to be a simple oil change at 5 years or 10,000 hours of operation.
- We give the opportunity to expand the machine according to the current production needs, even after a longer period of use.
